Company Overview

Adaptive Project Services (APS) is a dynamic provider of end-to-end project management and consulting solutions. We specialise in the successful delivery of complex projects across a variety of sectors, combining innovative thinking with proven methodologies.

At the heart of our approach is our commitment to building high-performing teams. We pride ourselves on identifying and deploying the right people – skilled, experienced, and aligned with our clients' values and objectives.

Through strong industry partnerships and an extensive professional network, we source top-tier talent to ensure each project is supported by the most capable and reliable team possible.

Our adaptive and client-focused methodology enables us to tailor strategies to specific project goals, ensuring optimal results in cost, time, quality, and stakeholder satisfaction. With a consistent track record of excellence, APS is committed to continuous improvement and delivering measurable value.

APS' Services

APS offers a comprehensive suite of services designed to support organisations through every phase of the project lifecycle:

PROJECT MANAGEMENT

End-to-end project management services encompassing planning, execution, monitoring, and closure – ensuring delivery on time, within budget, and to the highest standard.

PROJECT CONTROLS & GOVERNANCE

Robust controls for schedule, cost, risk, and reporting, ensuring full transparency and alignment with governance standards throughout the project.

CONSTRUCTION MANAGEMENT

Oversight of all construction phases from design to completion, ensuring regulatory compliance, risk mitigation, cost control, and schedule adherence.

COMMERCIAL MANAGEMENT

Strategic procurement, contract administration, and financial management aimed at maximising commercial outcomes and minimizing risk.

ASSET MANAGEMENT

Lifecycle-focused asset management strategies that enhance asset reliability, reduce costs, and ensure long-term value realisation.

CONTINUOUS IMPROVEMENT

Deployment of proven continuous improvement frameworks (e.g., Lean, Six Sigma) to boost efficiency, eliminate waste, and enhance project performance.

Differentiators

PROVEN EXPERIENCE

A strong track record of delivering complex projects across key industries, including strata title buildings and body corporates, mining and minerals, energy, electricity transmission and distribution, aluminium smelting, transport logistics and rail. Our team brings deep sector knowledge and practical expertise to every engagement, ensuring informed decision-making and dependable delivery.

TAILORED SOLUTIONS

We customise every engagement to align with client objectives, project scale, and complexity. Our deep understanding of owner's team requirements enables us to integrate seamlessly into client environments, provide strategic support, and deliver outcomes that align with both operational goals and governance expectations.

MULTIDISCIPLINARY EXPERTISE

A diverse team skilled in project management, engineering, commercial strategy, and operational improvement.

AGILE & ADAPTIVE METHODOLOGY

Flexible processes and proactive problem-solving allow us to respond effectively to change and keep projects on track.

RESULTS-DRIVEN CULTURE

Our focus is always on measurable results – reduced risk, improved ROI, faster delivery, and higher client satisfaction.

Recent Projects & Performance

TENERIFFE VILLAGE TRADE WASTE PROJECT

APS provided end-to-end project management services for the trade waste system upgrade at Tenerife Village, acting on behalf of the Body Corporate. This time-sensitive and complex project was delivered in a challenging brownfield environment, requiring careful coordination to maintain continuous operation of the basement car park and commercial tenancies. APS successfully sourced, engaged, and coordinated multiple contractors and consultants, led stakeholder consultation, and ensured safe execution and regulatory compliance. The team maintained strict adherence to schedule, business continuity, and budget, while delivering the project with minimal disruption to residents and businesses.

JERVOIS COPPER PROJECT

Provided project management, engineering and governance support for the development of the Feasibility Study for KGL Resources' Jervois Copper Project. APS ensured alignment with project milestones, effective risk management, and delivery of work scopes and market pricing for the Feasibility Study.

Recent Projects & Performance

BSL SHIP UNLOADER BOOM REPLACEMENT

Provided project management and governance for the ship unloader boom replacement at Boyne Smelters Limited (BSL). This time-sensitive and complex project was delivered in a challenging brownfield environment while the wharf remained fully operational. APS coordinated multiple contractors, engineers and stakeholders, ensured safe execution, and maintained strict adherence to schedule and operational continuity.

RIO TINTO ALUMINIUM SUSTAINING CAPITAL

Provided project management, engineering and governance support across multiple sustaining capital works programs within Rio Tinto Aluminium operations. APS played a key role in scope definition, contractor engagement, and implementation of integrated project controls, ensuring consistent delivery, compliance, and alignment with operational requirements.
